Professional Summary

Software Engineer with 4+ years of experience owning 0 -> 1 product development in startup and enterprise environments, bringing a versatile set of skills in full-stack development, cloud infrastructure, and hands-on LLM integration experience.

Experience

Full Stack Developer - Word of Mouth Technologies, Inc.

Jul 2024 – Present

- Served as one of the founding engineers for AI-powered language learning platform, building production-ready application from Figma designs through **Angular** frontend, **PostgreSQL** backend, and **AWS** cloud (EC2, S3).
- Integrated Azure AI Speech Services, including real-time speech-to-text, pronunciation assessment, and speech translation APIs to provide automated feedback and enhance learner outcomes.
- Developed and containerized a lip-reading prototype using LipNet ML model and Docker, reducing model deployment time by **50%** through standardized containerization.
- Validated platform effectiveness by conducting pre/post learning assessments with early users, demonstrating **63%** improvement in pronunciation accuracy through Azure Speech assessment metrics.

Associate Software Developer - UnitedHealth Group

Jan 2022 – Dec 2023

- Developed **REST APIs** for job status tracking and automated SMTP email notifications for an on-prem enterprise deployment platform built with **Spring Boot**, **.NET**, and **SQL**, supporting PySpark, Scala, and Python applications.
- Contributed to migrating legacy ASP.NET frontend to **React JavaScript** framework, implementing component-based architecture and state management that reduced frontend codebase by **30%**.
- Coordinated cross-functionally with software and data engineering teams using Agile methodology and JIRA for task tracking, and seamless project delivery.
- Architected and maintained **Apache Airflow** DAGs to automate ETL workflows, batch processing, and streaming jobs, including automated services that reduced manual operational effort by **30%** and improved system reliability.
- Utilized Splunk to monitor application logs, investigate job failures, and support operational stability across batch and streaming workflows.

Software Developer Intern - UnitedHealth Group

Jan 2021 – Jan 2022

- Engineered an end-to-end React-based onboarding portal with automated CI/CD using **GitHub Actions**, centralizing KT sessions, access documentation, and resources for **200+** new hires annually
- Implemented enterprise-grade security protocols including LDAP authentication and SSO integration to enforce role-based access control and protect confidential information
- Integrated OpenSearch for full-text search with optimized indexing, reducing documentation search time by **40%**, and validated functionality through automated testing using Jest.

Projects

FashON: AI-Powered Personal Styling App | (Flutter, iOS, Android, Firebase, OpenAI API)

- Built an AI-powered Flutter app for iOS and Android, enabling virtual wardrobe management, outfit recommendations, and outfit compatibility analysis using ML models, with outfit visualizations generated via the **OpenAI DALL·E 2 API**.
- Architected the app using MVVM and implemented secure authentication and access control with Firebase Authentication and Firestore security rules for user-level data isolation.

FabricFlow - Generative AI Orchestration | (Meta APIs, React, Google Gemini 2.0 Flash, ElevenLabs)

- Orchestrated multi-modal AI pipeline (Gemini 2.0, ElevenLabs, Meta Graph API) automating Instagram reel creation, reducing content generation from 2 hours to 30 seconds through serverless workflow coordination.
- Deployed on AWS/Supabase with OAuth, encrypted secrets management, and global CDN, enabling scalable real-time AI content generation with sub-minute latency.

Technical Skills

Programming Languages: Java, Python, TypeScript/JavaScript

Frontend Technologies: React, Vue.js, HTML5, Tailwind CSS

Backend & APIs: Node.js, Express.js, Spring Boot, Flask

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, DynamoDB), Azure (Blob Storage, Speech Services, Functions)

DevOps & Tools: Docker, GitHub Actions, Git, Postman, Jira

Certifications: [AWS Certified Developer - Associate](#)

Education

M.S. in Computer and Information Science, Syracuse University

GPA: 3.72/4.0
